

ABSTRACT

This invention provides a primer composition comprising the following (A), (B), (C) and (D) components:

- 5 (A) a saturated hydrocarbon polymer having at least one alkenyl group per molecule,
- (B) a silane coupling agent,
- (C) a polyvalent alkoxysilane and/or a condensation product thereof, and
- 10 (D) an organoaluminum compound and/or an organotitanium compound.
